SEAWEED MEAL-CALCULATOR FOR BARF-MEALS

Sea algae (Ascophyllum nodosum) are mainly used in barfish to meet iodine requirements. The correct dosage is crucial because the need is covered, but overdosing should be avoided in any case.

Weight of the dog

25,00 kg

Iodine content of seaweed meal

500,00 mg

Iodine per kilo of meal

Seaweed meal

Daily requirement

0,66 g

Weekly requirement

4,63 g
