

Please download the calcium calculator onto your computer and enter the relevant data in the fields, which are marked in red.

## Calcium calculator for BARF meals

If in the BARF meals of your four-legged friend bones shall be replaced by a calcium supplement such as bone meal, first of all, the necessary feeding amount of the supplement will have to be determined.

With our bone meal calculator you can easily calculate the right supplement amount for your dog or cat based on the amount of food per day. The values also apply to puppies and young dogs in the process of growth.

	Total amount of food per day (Gramm)	Amount of calcium per day (Gramm)	Amount of supplement per day (Gramm)	Calcium content of the supplement in percent (%)
 BARF without grain	<input type="text"/> g	<input type="text"/> g	<input type="text"/> g	
 BARF with grain	<input type="text"/> g	<input type="text"/> g	<input type="text"/> g	<input type="text"/> %
	<input type="text"/> g	<input type="text"/> g	<input type="text"/> g
